

Nu Film P

Benefits :

- Its acts as a sunscreen, preventing degradation of the pesticide residue by ultraviolet light.
- Protects the pesticide from heat decomposition by reflecting the solar radiation.
- Better spray deposition, greatly reduces run off and prevents re-wetting.
- Helps pesticide sprays to penetrate and spread out uniformly on hairy or waxy leaves to get into crevices.
- Protects loss due to rain, irrigation, dew, and leaf abrasion.
- Dries rapidly into a waterproof film. it protects systematically translocated chemicals untill they can penetrate and enter the plant tissue.
- Being a completely natural and non-toxic product itself, extends the life biological control organisms such as BT (*Bacillus Thuringiensis*) and viral agents.

Myfilm 23

Benefits :

- Its acts as a sunscreen, preventing degradation of the pesticide residue by ultraviolet light.
- Protects the pesticide from heat decomposition by reflecting the solar radiation.
- Better spray deposition, greatly reduces run off and prevents re-wetting.
- Helps pesticide sprays to penetrate and spread out uniformly on hairy or waxy leaves to get into crevices.
- Protects loss due to rain, irrigation, dew, and leaf abrasion.
- Dries rapidly into a waterproof film. it protects systematically translocated chemicals untill they can penetrate and enter the plant tissue.
- Being a completely natural and non-toxic product itself, extends the life biological control organisms such as BT (*Bacillus Thuringiensis*) and viral agents.

Mytron

Benefits :

- Improve the the performance of the agrochemicals by enchancing the penetration of spray solution into the leaves and uniform coverage of pesticide spray.
- It improves rainfastness of Glyphosate mixtures and ensure the effective control of general weeds. It is low foaming and suitable for most of the pesticide.

Mytrex

- Low rate – 2 to 3ml Mytrex in 10L
- Increase efficacy of herbicides
- Cost savings – reduces wastage of herbicide used
